

Camilla Menon

Industrial Engineer | Operations, Supply Chain & Production

Contacts: +39 …….. | ……..@gmail.com | LinkedIn

Industrial Engineer with an M.Sc. in Management and Industrial Systems Engineering, currently studying Science and Technology of Materials at TUM. Experience in BOM automation, project planning and routing optimization (Python). Looking for a Working Student position (20 hours per week) in operations or production.

EXPERIENCES

Internship – R&D Training Program

Pedrollo S.p.a., San Bonifacio (VR), Italy 05.2026 – 08.2026

- Conducted market research and competitor benchmarking, delivering PowerPoint presentations to support product development and portfolio decisions.
- Automated BOM generation in Excel using formulas to determine component types and quantities based on pump model codes and configurations.
- Developed an Excel-based project planning and timeline forecasting tool to improve project tracking and communication between R&D and Industrialization teams.

Research Thesis – Operations Research & Logistics Optimization

University of Vienna, Austria 04.2025 – 09.2025

When waste volumes fluctuate, is the shortest route still the most efficient one?

- Optimization model: Developed a multi-objective function for periodic Vehicle Routing Problems (PVRP) that rebuilds routes after a disruption, balancing distance minimization and similarity to the daily routes.
- Methodology: Defined and compared three route similarity measures, then implemented a metaheuristic algorithm in Python to identify the most effective approach.
- Results: Using the best-performing similarity measure, with weights of 0.75 (distance) and 0.25 (similarity), reduced distance by 1.3% compared with the distance-only solution, while also increasing similarity by 6.6% to the daily routes.

Chief technician (from Sept 2023) and graphic designer – Communications

E-Agle TRT (Formula Student), Trento, Italy 10.2022 – 08.2024

- Led a multidisciplinary team of 12 across photography, video production, and event management, coordinating activities and deadlines.
- Managed sponsor relations and technical communications, creating engineering-focused social content and presentations for sponsors, trade fairs, and Formula Student competitions.

EDUCATION

M.Sc. in Science and Technology of Materials (STM)

Technical University of Munich (TUM), Germany 10.2026 – present

- Study of advanced manufacturing technologies, including additive manufacturing and composites, emphasizing process control and the relationship between material structure and final product properties.

M.Sc. in Management and Industrial Systems Engineering

University of Trento, Italy 09.2023 – 12.2025

- Study of manufacturing system design, analysis, and optimization, with a focus on operations research, production planning, and advanced manufacturing technologies.
- Relevant Exams: Digital production and logistical systems, Risk Analysis, Project Management
- **Erasmus Exchange:** Chalmers University of Technology, Gothenburg, Sweden 08.2024 – 01.2025

Bachelor's Degree in Industrial Engineering, Materials Curriculum

University of Trento, Italy 09.2019 – 11.2023

- Study of industrial and mechatronics engineering, focusing on manufacturing technologies, production systems, and materials.

LANGUAGES

Italian: native

English: C1 (IELTS certified)

German: B1 (currently studying)

Driving license: B

IT SKILLS

Data & Analysis: Python, MATLAB, Wolfram Mathematica

Operations & Planning: Airtable, Excel, Microsoft Project

Productivity: Word, PowerPoint

Design & Visualization: Figma
